## Profile

Economist with three years inside corporate finance — treasury, billing and FP&A — building the data the business runs on myself: Python, SQL and Power BI over operations across 15+ countries in the Americas and the Eastern Hemisphere. Alongside it I run a PostgreSQL warehouse with dbt, 89 automated quality tests and a Power BI semantic model that refreshes itself daily, plus a credit decisioning system over 95 million records with ten governance gates. Every figure on my site links to the repository that produces it.

## The crossover role

Not a career change: I am pricing what I already do. In every finance role I ended up building code and data because the report the business needed did not exist and nobody else was going to build it. The edge is not knowing Python — plenty of people do. It is knowing which question is worth answering before writing the first line.

## Experience

### Neoris EPAM

*Business Consultant, FP&A*

Bogotá, Colombia · remote

Mar 2026 — present

- Designed and led financial management systems for SG&A close and forecast across 15+ countries in the Americas and the Eastern Hemisphere (India, Hungary, Spain, Czech Republic).
- Managed monthly close and company-wide forecast confirmation, analyzing variances against plan and prior forecast.
- Tracked FX variance in constant currency and per-currency inflation.
- Built FP&A reporting with advanced Excel, Power Query, Power BI, MicroStrategy, JD Edwards and SAP.

### SLB

*Internal progression: intern to specialist in 26 months.*

Bogotá, Colombia · hybrid

*Billing Specialist (Argentina & Brazil)*

Dec 2024 — Mar 2026

- Executed revenue recognition in SAP under Sarbanes-Oxley (SOX) requirements.
- Built Power BI models and visualizations for revenue and trend analysis.
- Performed internal audits on integrated technology projects, ensuring traceability and compliance.

*Treasury Analyst*

Oct 2024 — Dec 2024

- Cut roughly 10 hours of manual reporting per analyst per month — about 60 hours a month back to the team — by optimizing and automating the process.

*Treasury Intern*

Jan 2024 — Jun 2024

- Created Power BI dashboards for cash-flow projections across 15+ countries.

### LEE Javeriana

*Research Assistant*

remote

Jul 2023 — Dec 2023

- Analyzed Colombian education-system data with a focus on higher education.

### Solidarimente (volunteer)

*Social Data Analyst*

remote

Jan 2023 — Jul 2023

- Delivered analytical tools and insights for NGOs in multicultural environments.

## Projects in operation

### credit-risk-mlops

2026 — deployed

Python · LightGBM · scikit-learn · optbinning (WoE) · MLflow · ONNX · [github.com/DavinsonR/credit-risk-mlops](https://github.com/DavinsonR/credit-risk-mlops)

### JARVIS — personal tracking app

2026 — open demo

Next.js 16 · React 19 · TypeScript · Postgres (Supabase) · RLS · Tailwind · [public demo, no account](#)

### market-data-medallion

2026 — in operation

PostgreSQL · Medallion architecture · dbt · Python · Prefect · GitHub Actions · [github.com/DavinsonR/market-data-medallion](https://github.com/DavinsonR/market-data-medallion)

### Financial inclusion and regional growth in Colombia

2026 — thesis filed

dbt · DuckDB · Python · Parquet · Panel data · Quarto · [repository on GitHub](#)

## Education

**M.Sc. in Economics — Pontificia Universidad Javeriana**

2025 — 2026

**B.Sc. in Economics — Pontificia Universidad Javeriana**

2020 — 2024

**Systems Technician — SENA**

2018

**Certifications:** Machine Learning Specialization (Stanford · Coursera, 2024) · Cybersecurity Certificate (Google · Coursera, 2024) · Data Science with Python (Platzi, 2023)

## Recognition

**Winner — BodyTech Trends Hackathon (2024)**

**Ecopetrol Scholar — Mario Galán Gómez Program (2018)**

## Stack

Financial analysis and FP&A · SAP · Excel and financial modelling · Power BI · Tableau · Python · SQL · PostgreSQL · dbt · DuckDB · Git · GitHub Actions · Panel econometrics · Diagnostics and robustness · Machine learning · Credit risk and scorecards · Model governance (MLOps)
