Profile

Economist with three years inside corporate finance — treasury, billing and FP&A — building the data the business runs on: Python, SQL and Power BI applied to operations across 15+ countries in the Americas. I now run a production PostgreSQL warehouse in medallion architecture, with dbt transformations, 89 automated quality tests and a Power BI semantic model, refreshed daily with no manual step. I am looking for a remote role where financial judgment and data engineering are paid as one capability, not two halves.

The crossover role

This is not a career change; it is pricing what I already do. In every finance role I ended up building the same thing — code and data — because the report the business needed did not exist. An FX mismatch analysis in Python as an intern. Automation that gave every treasury analyst about 10 hours a month back — close to 60 a month across the team. Power BI models that turned a monthly close into a decision. The edge is not knowing Python; it is knowing which question is worth answering before writing any. A Finance Data Analyst is neither a data analyst who picked up finance nor a finance person who picked up code — it is the one who needs no translator between them.

Experience

Neoris EPAM

Business Consultant, FP&A

Bogotá, Colombia · remote

Mar 2026 — present

- Designed and led financial management systems for SG&A close and forecast across 15+ countries in the Americas and the Eastern Hemisphere (India, Hungary, Spain, Czech Republic).
- Managed monthly close and company-wide forecast confirmation, analyzing variances against plan and prior forecast.
- Tracked FX variance in constant currency and per-currency inflation.
- Built FP&A reporting with advanced Excel, Power Query, Power BI, MicroStrategy, JD Edwards and SAP.

SLB

Internal progression: intern to specialist in 26 months.

Billing Specialist (Argentina & Brazil)

Bogotá, Colombia · hybrid

Dec 2024 — Mar 2026

- Executed revenue recognition in SAP under Sarbanes-Oxley (SOX) requirements.
- Built Power BI models and visualizations for revenue and trend analysis.
- Performed internal audits on integrated technology projects, ensuring traceability and compliance.

Treasury Analyst

Oct 2024 — Dec 2024

- Automated bank reconciliation in SAP, improving accuracy and efficiency.

Treasury Intern

Jan 2024 — Jun 2024

- Built a comprehensive FX mismatch analysis for Latin American markets in Python, identifying financial risks and hedging opportunities.

LEE Javeriana

Research Assistant

remote

Jul 2023 — Dec 2023

- Analyzed Colombian education-system data with a focus on higher education.

Solidariedade (volunteer)

Social Data Analyst

remote

Jan 2023 — Jul 2023

- Delivered analytical tools and insights for NGOs in multicultural environments.
