Profile

Economist with three years inside corporate finance — treasury, billing and FP&A — building the data the business runs on myself: Python, SQL and Power BI over operations across 15+ countries in the Americas and the Eastern Hemisphere. Alongside it I run a PostgreSQL warehouse with dbt, 89 automated quality tests and a Power BI semantic model that refreshes itself daily, plus a credit decisioning system over 95 million records with ten governance gates. Every figure on my site links to the repository that produces it.

The crossover role

Not a career change: I am pricing what I already do. In every finance role I ended up building code and data because the report the business needed did not exist and nobody else was going to build it. The edge is not knowing Python — plenty of people do. It is knowing which question is worth answering before writing the first line.

Experience

Neoris EPAM

Business Consultant, FP&A

Bogotá, Colombia · remote

Mar 2026 — present

- Designed and led financial management systems for SG&A close and forecast across 15+ countries in the Americas and the Eastern Hemisphere (India, Hungary, Spain, Czech Republic).
- Managed monthly close and company-wide forecast confirmation, analyzing variances against plan and prior forecast.
- Tracked FX variance in constant currency and per-currency inflation.
- Built FP&A reporting with advanced Excel, Power Query, Power BI, MicroStrategy, JD Edwards and SAP.

SLB

Internal progression: intern to specialist in 26 months.

Billing Specialist (Argentina & Brazil)

Bogotá, Colombia · hybrid

Dec 2024 — Mar 2026

- Executed revenue recognition in SAP under Sarbanes-Oxley (SOX) requirements.
- Built Power BI models and visualizations for revenue and trend analysis.
- Performed internal audits on integrated technology projects, ensuring traceability and compliance.

Treasury Analyst

Oct 2024 — Dec 2024

- Automated bank reconciliation in SAP, improving accuracy and efficiency.

Treasury Intern

Jan 2024 — Jun 2024

- Built a comprehensive FX mismatch analysis for Latin American markets in Python, identifying financial risks and hedging opportunities.

LEE Javeriana

Research Assistant

remote

Jul 2023 — Dec 2023

- Analyzed Colombian education-system data with a focus on higher education.

Solidariamente (volunteer)

Social Data Analyst

remote

Jan 2023 — Jul 2023

- Delivered analytical tools and insights for NGOs in multicultural environments.
